## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-20 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They are replete with grammatical and idiomatic errors. The amendments to change or delete many of the indefinite and definite articles cause the grammar to be unclear. Changes to other parts of the language also make the claims grammatically awkward. For example, claim 11 line 2, "a road for motor vehicles" has been changed to "a road for motor vehicle." Since the claim states "consisting of," it appears applicant is claiming a road that can accommodate only a single vehicle. Other issues regarding awkward uses of plurals exist in the claims. The addition of the phrases beginning with "or" in lines 8 and 10 of claim 11 are indefinite because it is unclear what is and is not required by the claims. This repetition of alternative language in a claim recited as "consisting of" is indefinite because there is no clear scope regarding what elements are required and what are optional. In short, the claims as amended are so replete with errors and awkward language that it is unclear what applicant is claiming. Claim 20, as discussed previously, recites a method in the preamble but includes no method steps. This claim has not been further treated on the merits.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-19 rejected under 35 U.S.C. 102(b) as being anticipated by Lee (WO 01/94702).

As best understood in the claims, Lee meets claim limitations. Looking to Figure 2, Lee discloses a multi-level road system. Each of the levels have a similar width and are arranged in a grid pattern.

There is a ramp.

Lee discloses sidewalks.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (WO 01/94702).

As discussed above, Lee appears to meet claim recitations. Lee discloses more than levels than it appears applicant is attempting to limit the claims to. It is well known to construct

as many or as few levels of roads as deemed necessary to meet design traffic demand.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used fewer levels with Lee in order to service an area with a relatively low population; thereby reducing costs since unneeded, unused structures would need not be constructed.

### ***Response to Arguments***

Applicant's arguments filed 30 April 2009 have been fully considered but they are not persuasive. As discussed above, the language of the amended claims is so indefinite that the scopes of the claims are unascertainable.
